Coleman Womens' Institute Held Annual Meeting Tuesday

Mrs. A. W. H. McLeod Again Heads Organization—Will Present Gold Medal To A. Janostak at Community Concert Wednesday, December 2nd.

The regular meeting of the W. I. took place in the Council Chambers on Tuesday evening, November 24. It was decided to ask the department for the millinery course in 1926, cooking to be second choice. The gold medal donated by the Institute to the winner of Grade VIII in the public school, will be presented to A. Janostak by President A. W. H. McLeod at the community concert on Wednesday evening, December 2nd.

The annual meeting was held at the close of the regular meeting. The annual report was read and adopted. This was followed by the election of officers for 1926. Honorary President—Mrs. C. S. Oulmette.

President—Mrs. A. W. H. McLeod
1st Vice President—Mrs. W. L. Rippon.

2nd Vice President—Mrs. D. E. McLean.

Secretary-Treasurer—Mrs. Walter Bosworth.

Directors—Mrs. J. A. Price, Mrs. C. S. Oulmette, Mrs. Alex. Cornett, Auditors—Mrs. A. Graham, Mrs. A. F. Short.

Program Committee—Mrs. W. L. Rippon, Mrs. E. F. Gare, Mrs. A. Graham, Mrs. W. J. Burns, Publicity Secretary—Mrs. Jack Hollett.

Several other committees will be elected at the January meeting and additional reports submitted.

LOCAL, PERSONAL AND GENERAL NEWS

Premier Herbert Greenfield resigned as head of the Alberta cabinet, a position he had held since 1921, on Monday of this week. Attorney-General Brownlee took up in as premier the same day and re-organized the provincial cabinet. A general election is scheduled to take place early in 1926.

Mrs. H. Wilson and children left Coleman, on Sunday night's train for Timmins, Ontario, where they will join Mr. Wilson who left town several months ago.

The intersection of Main street and Central avenue has been adorned with a more pretentious sign, policeman this week. The top of the new standard will carry a large electric light, and is a decided improvement over the old traffic sign. Contractor A. R. Knowles erected the standard for the town authorities.

The Fernie hospital has this week installed a new X-ray machine at a cost of over \$1200. The cash payment for the machine was made possible by a generous donation from W. K. Wilson. It is the intention of the hospital committee from time to time to add the very best equipment that can be secured until the Fernie hospital is second to none in the west. The new machine was purchased in Winnipeg—Ferne Free Press.

The Ladies Auxiliary of the United Church will hold a "Sale of Work" and Tea in the Club Room on Saturday, November 28th, from 3 to 5:30. Don't miss this chance of securing some useful Christmas gifts.

Sat in a picture show the other night. Young man and woman came in and sat down in front of us. Girl removed her hat, produced a comb and gave a couple of minutes attention to her hair. Then she passed her comb to her escort and he restored the gloss and correct angles to his greased locks. Shades of Sir Walter Raleigh!

The Rev. W. T. Young, Blairmore, visited the local Tuxis group in the Club Room of the United Church on Monday evening. They enjoyed the talk given by this expert in boy's work. He kept the boys busy at group games and made them feel they had a worth-while programme. The boy's entertained their visitor afterwards, and they know how. Under Mr. Wesley Watts this class is making fine progress.

Mrs. Fred Johnson and Mrs. T. Johnson and children left last Wednesday for Drumheller to join their husbands who are working in the Valley Coal City.

Friday night's east bound passenger train due at 10:37, did not arrive in Coleman until 9:35 a.m. on Saturday, owing to a deranged freight engine going into Moyle Lake. The fireman on the engine lost his life and efforts to locate the body have so far been unsuccessful.

Meers, W. Antel and H. Boulton brought down a fine buck deer near Pelletier's lumber camp north of town, one day last week.

Say It With Flowers

When you require flowers artistically arranged for any occasion, at moderate prices, and of unequalled quality, phone No. 12, THE COLEMAN TRADING CO., LTD., agents for Frache Bros., Lethbridge.

Winners at cards at the Robekah child's drive and dance last Saturday evening were: Mrs. C. Graham 1st, Mrs. J. L. Leasbury 2nd, Mr. W. Vincent 1st, Mr. M. Lewis 2nd. On Saturday of this week another social evening will be held.

Mr. Frank J. Smith of Hillcrest, returned home yesterday after graduating from the Jean Carroll School of Beauty Culture, Calgary. Announcement appears elsewhere in our advertising columns.

NOTICE

The annual meeting of the Coleman Crystal Rink, Limited, will be held in the Council Chambers, Coleman, on Thursday, the 26th day of November, 1925, at 7 o'clock p.m.

R. F. BARNES, Secretary.

Nominations for the next general provincial election are being made almost every day, just as if there were no possibility of a redistribution, or any change in the present constituencies.

Mr. Macdonald, of Nordegg, arrived in Coleman early this week to take the position of caretaker and janitor at the Arena.

Mr. H. E. Gate is holding her Mid Winter Sale of Ladies and Children's Hats, commencing Friday, Nov. 27th and closing Thursday, Dec. 3rd. See her announcement on page 5 of this issue.

A memorial service for the late Dorothea Queen Alexandra, and by request, for Mrs. Percy Locke, will be held at St. Alban's Church on Sunday, Nov. 29th, at 7 p.m. All patriots and friends are invited.

"We don't have Boy Scouts in this court," said Magistrate Arnold, of Chatham, Ont., recently and advised two boys before him for misdemeanors to go and join a troop. "Scouts conduct themselves on the principle of doing good turns to people, not annoying them," he declared.

When the Journal announced in its issue of Oct. 15th, that work at the local mines would improve in November, a number of chronic cough hangers ridiculed the idea, and said it was all hot air. Who was right? Present prospects indicate even better working conditions than The Journal forecasted at that time.

Rev. R. W. Hihbert, M.A., B.D., and Mr. Hendry will visit Coleman on Friday of this week. The Rev. Mr. Hihbert will conduct a Sunday school teachers conference during the afternoon on Friday, while on Saturday Mr. Hendry will have charge of Tuxis and Trail Ranger classes. On Sunday morning Mr. Hendry is scheduled to speak in the United Church.

Old King Tut II, of Blairmore, is endeavoring to create the impression that The Journal is, as he calls it, "knocking." The Coleman Senior Hockey Club. We did not mention the local hockey club in our issue of Nov. 5th. To the best of our knowledge this organization ceased to function last winter. Our natural modesty would prevent us from saying anything unkind about the departed. However, if there are some supporters of senior hockey in Coleman who have money and are anxious to get rid of it, there is nothing in the world to stop them from doing so. The editor of The Journal is not taking any tea as long as the old league gang is in control of senior hockey in The Pass.

Coleman Crystal Rink Makes Excellent Showing

Increased Revenue, Increased Profit on Operation and Reduce Their Liabilities During 1924-25, Hold Annual Meeting Tonight.

The annual meeting of the Coleman Crystal Rink, Limited, took place on Thursday evening of this week at 7 p.m. in the Council Chambers. Business to come before this meeting is election of directors and the placing before the shareholders a report of the operations of the rink during the 1924-25 season including the auditor's report. One of the outstanding features of the financial statement recently issued by the directors of the Company shows that the 1924-25 profit on rink operation was \$767.81 as compared with \$210.45 in 1923-24, an increase of \$557.36. This is in itself a very commendable showing when one takes into consideration the unfavorable circumstances under which the Company operated last season.

Another very pleasing feature as set forth in the auditor's report is the reduction in liabilities under the heading of loans. In the 1924 statement loans stood at \$1300.00, while this year's loans are only \$500.00, a decrease in this form of liabilities of \$800.00.

Last year showed a big increase in receipts from skating and hockey. The total for the two being \$2782.90 as against \$2084.10 in 1924, an increased revenue of \$698.80. This big increase is mainly accounted for by the energetic methods adopted by the directors in the sale of season skating tickets at the time of the Carnival last autumn.

The only branch of the company's activities showing a decrease in revenue last year from the previous season was the receipts from the Curling Club. In 1923-24 a general received from the curlers amounted to \$568.00 while last year this dropped to \$376.00, being a decrease of \$192.00. This year the directors of the Coleman Crystal Rink have stipulated that the Curling Club pay a minimum rental of \$560.00, so the company in future will be protected against any loss of revenue from this source.

A complete copy of the financial statement of the company will be found on page 5 of this issue.

St. John Ambulance Association Elect Officers Form District Association at General Meeting.

A general meeting of the St. John Ambulance Association was held on Sunday afternoon last in Central School, Coleman. A large number were in attendance including many from Blairmore, Bellevue and Hillcrest. The first matter of business taken up by the local branch was the election of officers and resulted as follows:

Hon. Presidents—O. E. S. Whitehead, Geo. Kellock.
President—D. Davidson.
Sec'y—Treas.—J. M. Rushton.
Executive Committee—W. White R. M. Greenhalgh, W. Kerr, R. G. Wells, J. Glendenning.
Instructors—W. White, R. M. Greenhalgh.
Lecturers—Mrs. Tolmie and Kines.
At the close of the above meeting

a second sitting took place, and it was decided to form an association to be known as The Crown's Next Pass First Aid Association, for which officers were appointed as follows:

An honorary president from Coleman Blairmore, Bellevue, Hillcrest and Mr. Stirling, of Edmonton.
President—Moses Johnston, Blairmore.
Vice President—D. Davidson, Coleman.
Sec'y—Treas.—E. Royle, Hillcrest.
Executive Committee to consist of two men chosen from each of the four towns in The Pass.
It was also decided to hold a First Aid Competition in The Pass on May 1st, 1926.

Town Band Holds Re-organization Meeting

At a meeting of the members of the Town Band held in the Council Chambers on Sunday evening last, the following officers were elected: Hon. Presidents—G. Kellock, O. E. S. Whitehead.
Hon. Vice-Presidents—D. Davidson, J. McLeod.
President—B. P. Lewis.
Vice-President—W. H. Garner.
Sec'y, Treasurer—W. Lounsbury.
Bandmaster—J. Pearson.
Deputy Bandmaster—A. Morris.
Librarian—J. Smillie.

To Carve Up Tut?

The tireless hounds of science have at last caught up with poor young King Tut. He has stood them off for two years, but with witless and relentless insistence they have kept on his trail and finally downed him. They have got him out of his coffin and are now to conduct a post mortem. To be assured whether the lad died of tuberculosis or whether he was done in with the ancient equivalent of an adverse vote in the house. These are the things that matter when you are dealing with the

Seven Bouspiel Rinks Already in Sight Here.

Coleman curlers are losing no time in preparing rinks for participation in the Crown's Next Pass Bouspiel in Coleman the early part of January, and already seven strong rinks have been formed out of the ranks of Coleman curlers. It is expected that one or two more will be ready to take the ice as entrants from the local club by the time January 18th, the opening day of the Spiel, is at hand.

Local skips who have announced their intention of piloting a rink in the Spiel are as follows:—Messrs. H. C. McBurney, J. Bell, George Kellock, R. G. Powell, S. Moore, J. H. Boulton, and C. J. Devine.

Somewhat it seems that so much more good might arrive if the energy, audacity and tenacity that had been expended on this discovery had been added to the work of discovering newer and better means of fighting tuberculosis among the living rather than to finding out who died of it a million years ago.

Advertisers are requested to have their advertising copy in early during the Christmas season. The Journal cannot guarantee insertion of copy received later than Wednesday morning.

one United States this year will be dutiable at 10 per cent. Last year a Tatted States treasury decision admitted them free as "sticks of wood in the rough."

Argentina will harvest one of the most bountiful crops in its history for the season of 1925-26. It is indicated by the ministry of agriculture's first report of the season on conditions of cereal and linseed yields.

Cheapest of all Oils.—Considering the quality of the "Thomas" Electric Oil it is the cheapest of all preparations offered to the public. It is to be found in every drug store in Canada from coast to coast and all country merchants keep it for sale. 80¢ being easily procurable and extremely moderate in price, no one should be without a bottle of it.

Wellington: "Can I borrow a cigar?"
Warrington (tensely): "Well, you ought to be able to—y'ou've had."

BAREE, SON OF KAZAN

by James Oliver Curwood

A LOVE EPIQUE OF THE FAR NORTH

Copyright, 1917, by Doubleday, Page & Co.

"BAREE, SON OF KAZAN," a Vitaphone Picture, With Wolf, the War Dog. Is an Adaptation of This Story

SYNOPSIS

With the coming of the tonic-filled days and nights of the Red Moon, a change came over Baree. No longer the trapper's daughter, had made a pet of him, but Baree was half wolf and at the call of the wolverine he fled, to join his own, as Pierrot, the trapper, had predicted. "Go, Baree," Nepeese enjoined him. "But you must come back." Baree entered the woods and joined Mahegun, a young she-wolf, who also was seeking the pack. The ears of both were attuned for the slightest sounds from the wolves.

CHAPTER XVII.—Continued.

"The snow grew deeper under their feet. In the open spaces the moonlight shone through it to their knees, and it continued to fall in a vast white cloud that descended steadily out of the sky. It was near midnight when it stopped. The clouds drifted away from under the stars and the moon, and for a long time Baree and Mahegun stood without moving, looking down from the bald crest of a ridge upon a wonderful world.

An hour after they entered the plain there came suddenly out of the west the tongue of the wolfpack. It was not far distant, probably not more than a mile along the foot of the ridge, and the sharp, quick yapping that followed the first outbreak was evidence that the long-fanged hunters had put up sudden game a caribou or young moose, and were close at its heels. At the voice of her own people Mahegun held her ears close to her head and was off like an arrow from a bow.

The unexpectedness of her movement and the swiftness of her flight put Baree well behind her in the race over the plain. She was running blindly, favored by luck. For an interval of perhaps five minutes the pack were so near to their game that

TO EXPECTANT MOTHERS

Letter from Mrs. Ayars Tells How Lydia E. Pinkham's Vegetable Compound Helped Her

Spring Valley, Sask.—"I took the Vegetable Compound before my last confinement, when I began to feel so badly that I could not sleep nights, my back ached so across my hips, and I could hardly do my work during the day. I never had such an easy confinement and this is my sixth baby. I read about Lydia E. Pinkham's Vegetable Compound in the 'Farmer's Telegram' and wrote you for one of your books. I have no drugstore in my town, but I saw your medicine in T. Eaton's catalogue. I am a farmer's wife, so I have all kinds of work to do inside and outside the house. My baby is a nice healthy girl, who weighed nine pounds at birth. I am feeling fine after putting in a large garden since baby came. (She is as good as she can be.) Yours is as good as mine. I have told about it and even written to my friends about it."—Mrs. ANNIE E. AYARS.

Spring Valley, Sask.—Lydia E. Pinkham's Vegetable Compound is an excellent medicine for expectant mothers, and should be taken during the entire period. It has a general effect to strengthen and tone up the entire system so that it may work in every respect as nature intends. All druggists sell this dependable medicine. It is a trial.

W. N. U. 1604

but one course of slight—straight ahead.

Baree had found his place in the lower rim of the horseshoe, so that he was fairly well in the rear when the climax came. The plain made a sudden dip. Straight-ahead was the gleam of water—water shimmering softly in the starlight, and the stars of it sent a final great spurt of blood through the caribou's burning heart. Forty seconds would tell the story—forty seconds of a last spurt for life, of a final tremendous effort to escape death.

Baree felt the sudden thrill of these moments, and he fought ahead with the others in that lower rim of the horseshoe as one of the leading Fangs made a lunge for the young bull's hamstring. It was a clean miss. A second wolf darted in. And this one also missed.

There was no time for others to take their place. From the broken end of the horseshoe Baree saw the caribou's heavy plunge into the water. Baree felt the sudden thrill of these moments, and he fought ahead with the others in that lower rim of the horseshoe as one of the leading Fangs made a lunge for the young bull's hamstring. It was a clean miss. A second wolf darted in. And this one also missed.

The restless movements of the waters ceased now. A new half-wondering interest held them rigid. Fangs closed sharply. A little in the upper bare Mahegun, with a big gray wolf standing near her. He went to her again, and this time she remained with flattened ears until he was sniffling her neck. And then, with a vicious snarl, she snapped at him. Her teeth sank deep in the soft flesh of his shoulder, and at the unexpectedness and pain of her attack, he let out a yelp. The next instant the big gray wolf was at him, and with a vicious snarl, she snapped at him. Her teeth sank deep in the soft flesh of his shoulder, and at the unexpectedness and pain of her attack, he let out a yelp. The next instant the big gray wolf was at him, and with a vicious snarl, she snapped at him.

Again caught unexpectedly, Baree went down with the wolf's fangs in his throat. But in him was the blood of Kazan, the flesh and bone and sinew of Kazan, and he was not so easily killed. He fought as Kazan fought on that terrible day at the top of the Sun Rock. That fight, if it had been fair, would have been a victory for Baree, even in his youth and inexperience. In fairness the pack should have waited. It was a law of the pack to wait—until it was done for. But Baree was black; he was a stranger, an interloper, a creature whom they noticed now in a moment when their blood was hot with the rage and disappointment of killers who had missed their prey. A second wolf sprang in, striking Baree treacherously from the flank and while he was in the snow, his jaws crushing the forest of his first foe, the pack was on him en masse.

Such an attack on the young caribou would have meant death in less than a minute. Every Fang would have found his hold. Baree, by the fortunate circumstance that he was under his first two assailants and protected by their bodies, was saved from being torn instantly into pieces. He knew that he was fighting for his life. Over him the horde of beasts rolled and twisted and snarled; he felt the burning pain of teeth sinking into his flesh; he was smothered, a hundred knives seemed cutting him into pieces; yet no sound—not a whimper or a cry—came from him now in the horror and hopelessness of it all.

It would have ended in another half-minute had the struggle not been at the very edge of the bank. Undermined by the erosion of the spring flood, a section of the bank suddenly gave way, and with it went Baree and half the pack in a flash. Baree thought of the water and the escaping caribou. For a bare instant the cave-in had set him free of the pack, and in that space he gave a single leap over the gray backs of his enemies into the deep water of the stream. Close behind him half a dozen Fangs snapped shut on empty air. As it had faded the caribou, so this strip of water shimmering in the glow of the moon and stars had saved Baree. The stream was not more than a hundred feet in width, but it coasted Baree close to a losing struggle to get across it. Until he dragged himself out on the opposite shore, the extent of his injuries was not impressed upon him fully. One hind leg, for the time, was useless; his forward left shoulder was laid open to the bone; his head and body were torn and cut; and as he dragged himself slowly away from the stream, the trail he left in the snow

INECTO RAPID

was a red path of blood. It trickled from his panting jaws, between which his tongue was bleeding; it ran down his legs and flanks and belly, and it dripped from his ears, one of which was slit clean for two inches as though cut with a knife. His instincts were ached, his perception of things clouded as if by a veil drawn close over his eyes.

(To be continued)

Wonders Of Malay Jungle

Is Described As A Topsy-Turvy Land By A British Investigator

An extraordinary account of the Malay jungle was given in a lecture delivered by Carveth Wells, who has just returned to London after surveying the British railroad which runs through the jungle. Darwin, who visited the jungle, called it a "topsy-turvy" land, and this is the first time a full account of it has reached London.

"Nature seems to have been completely upset by the absence in the jungle of any marked seasons," said Mr. Wells. "You will find birds nesting in one tree and the same kind of birds moulting in another. You may have a tree in your garden with fruit while your neighbor has the same tree blossoming."

"The jungle is still the home of tigers, panthers, elephants, rhinoceroses and snakes thirty foot or more. There are butterflies more than a foot across."

"The Malay bird, a small parrot, called acrid, sleeps upside down. Another bird, the bustard quail, is peculiar because the female is larger than the male. She lays the eggs and he sits on them, and during the mating season she fights for him."

"The most amazing animal is a native fish which seldom is seen in the water. I saw one come out of a hole in the ground, hop, skip, jump and walk to a tree and climb up it. The fish seems to feel the heat, because one can see them walk down trees to pools, where they take baths. This fish is named by scientists peripateticus, or funny fish."

"Crabs eat coconuts, fish eat coral, and rats live in tops of tall trees. There seems to be a biggest and a smallest everything. There is the big tortoise insect in the world, thirteen inches long, and the smallest mammal, which weighs less than an ounce."

Mr. Wells showed slides of all the animals and conditions he described. He also demonstrated how the natives make fire by compressing air at such a degree of heat in a little bone cylinder that a spark is produced.

Queer Farms In California

Freak Establishments Where Alligators, Ostriches and Butterflies Are Raised

In the language of Southern California, "farms" is the word commonly used to describe a freak establishment, like the alligator nursery. It is a place where one raises crocodiles or alligators, or even a few ostriches, or a few butterflies. It is a place where one raises crocodiles or alligators, or even a few ostriches, or a few butterflies. It is a place where one raises crocodiles or alligators, or even a few ostriches, or a few butterflies.

Freak farms are on the increase and the increase is not altogether welcome. The chamber of commerce of Los Angeles issued a friendly warning to new settlers that there really is no room for more freak-breeding rabbit farms and that "the individual investor who enters the rabbit breeding industry for the purpose of selling furs will find himself disappointed."

So far, however, the alligator farm sphere does not seem to be overcrowded, and there are at least two prosperous ostrich farms, a goldfish farm, a lion farm, two butterfly farms, a frog farm, several silver fox farms and a number of pigeon farms.

New Type Engine For Logging Camps Diesel engines will be brought into use in the logging camps of the Pacific coast next year, if recommendations before the Pacific logging congress, held recently at Seattle, are adopted. The increasing remoteness of the timber regions and the prohibitive cost of roads and gasoline make it necessary, it is said, to find some other form of power.

A bachelor says that marriage may be a cure for loneliness, and that the remedy is worse than the disease.

Prevent Grippe with Minard's Liniment

And Now Synthetic Rubber

Germans Claim to Produce Synthetic Rubber From Potatoes

German scientists have succeeded in producing synthetic rubber from potatoes. The synthetic product is said to compare favorably in elasticity with the distilled sap of rubber trees. According to Chemiker-Zeitung, the discovery was accidental. Various chemists, endeavoring to establish the chemical composition of India rubber, isolated isopren, the most important ingredient of rubber. Isopren, it was found, is contained in potatoes.

The chemists abandoned their original research and, concentrating on potatoes, developed a method of combining the potato isopren with other chemicals to produce synthetic rubber.

PURE RICH BLOOD MEANS GOOD HEALTH

Also It Means Bright Eyes, Red Lips and Rosy Cheeks

The red of sufficient red, health-giving blood does not end merely in pale faces and listless eyes. It is much more serious. Bloodless people are the tired, languid, rundown people who have no enjoyment in life. They have heart palpitations, headaches and backaches, no appetite, sometimes fainting spells, and always nervousness. Just a little more rich, red blood and these troubles vanish. To have heart palpitations, headaches and backaches, no appetite, sometimes fainting spells, and always nervousness. Just a little more rich, red blood and these troubles vanish.

It is hardly apt to do anything about "house and head" without first starting at night, with my heart pounding violently. If I walked upstairs I would be breathless and my heart would flutter rapidly. I used doctor's medicine but it did not do me any particular good. Then I was advised to take Dr. Williams' Pink Pills. I decided to try them, and I can only say that they did wonders for me. An new well and strong again and able to do all my work, and this is all due to Dr. Williams' Pink Pills. I have recommended the pills to others who have taken them with equally good results.

You can get the pills from your druggist, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Put Away For the Night

Robert was making his first trip to a Pullman sleeper and had been in the upper berth. During the night he was awakened and began to cry. "Don't you know where you are?" his mother asked. "Course I do," was the reply. "I'm in the top drawer."—Chicago News.

Your Asthma, Too

The efficacy of Dr. J. B. Keating's Asthma Remedy is not something that is merely hoped for; it is to be expected. They are called from classical theatre or sleep as the emergency quites.

There will be no provincial election in Manitoba in 1925, Premier Bracken announces, his intention being to carry on for the full term.

Clarence Sutherland Campbell, B.A., an Edmonton man, has been awarded the Alberta Rhodes Scholarship for 1925.

A new comet between the 8th and 9th magnitudes, appearing in the "Hawkeye" constellation, has been discovered by Professor Van Eisebroeck, University of Chicago.

A White House guard at the time of Abraham Lincoln's assassination, chief of army units under General Canby and a friend of Buffalo Bill, Peter Becker, 52, is dead at Colorado Springs.

An extra cross-channel plane was chartered at London to carry a sick man who could not endure the possible shock of a railway or steamship trip. Special shock absorbers were introduced and the trip made in safety.

Canadian Christmas trees, entering the United States this year will be dutiable at 10 per cent. Last year a United States treasury decision admitted them free as "sticks of wood in the rough."

Argentina will harvest one of the most bountiful crops in its history for the season of 1925-26, it is indicated by the department of agriculture's first report of the season on conditions of cereal and flaxseed yields.

Cheapest of all Oils—Considering quantities of Dr. Thomas' Eucodine Oil it is the cheapest of all preparations offered to the public. It is to be found in every drug store in Canada from coast to coast and all country merchants keep it for sale. So, being easily procurable and extremely moderate in price, no one should be without a bottle of it.

Practice
"Wellington: 'Can I borrow a cigarette?'"

Warrenton (seriously): "Well, you ought to be able to—you've had enough practice."

Buffalo Jones, a hunter of the southwestern states, has been and captures alive mountain lions in their native wilds.

Mrs. Annie E. Perry

Canada is taking a year for cost in preference to the United States, according to the bureau of statistics, the manufacture of fur coats, both women's and men's, is increasing, while that of fur-lined coats is declining.

Last year, there were 40,000 women's fur coats in Canada, but only 800 women's fur-lined coats.

If all were qualified to do something useful, where would the world be?—L. J. Lewis

When a woman decides that clear ashes aren't good for the carpet, the lioness is over.

A bee dies when it stings you. Now it will be crossed with the man who sells stock.

U. S. and Agitators

Will Curb Propaganda Which Has Become Dangerous to the Bate

A growing impatience is manifest in the United States with the malcontent element of the population, mostly of foreign birth or descent, who take every opportunity of maligning the state and its institutions while enjoying privileges unknown in the countries of their origin. A series of recent events indicate that the long-suffering authorities are nearing the limits of toleration for the disgruntled agitators who presume to dictate what governmental policy should be upon matters vitally affecting the welfare of the nation and the preservation of the American spirit. The attempts of New York groups of irremediables to annoy and insult distinguished citizens or visitors have been receiving adequate police attention of late weeks, while the raids made by Scotland Yard upon Communist headquarters indicate an intention to curb propaganda which has become dangerous to the degree of danger—Montreal Gazette.

Diet and Disease

Instilling the Fundamental Principles of Food Chemistry in the Public Mind

Sir William Arbuthnot Lane, of London, tells the American College of Surgeons at Philadelphia that 95 per cent of all human beings are eating themselves into an early grave.

Says he: "It is not an exaggeration to say that we suffer and die through the ill which arise from our alimentary habits."

With this opinion Dr. Charles Mayo and most of America's greatest surgeons agree.

Food chemistry has become the greatest single factor in the prevention and cure of disease.

And, within the next few years, the first and foremost task of the medical profession will be to install the fundamental principles of food chemistry into the public mind.

Once the world is taught how to eat, hospitals and operating theatres will go out of business—Vancouver Sun.

Reduce Butter Output in England

English Farmer Can Make More Money Selling Milk

England's picturesque dairymen, whose pink cheeks and fair complexions are the envy of their city sisters and the inspiration for countless artists and poets, may soon be a legend. And all because the English farmer has found out that he can make more money by selling his milk than he can by making butter.

It takes two and a half gallons of milk to make a pound of butter for the farmer. As a consequence, the farmers are disparaging their butter-making apparatus and are buying butter in many cases for their own use. The importation of butter into Great Britain is increasing.

Believe Alaska Was Once Tropical Country

Prospectors Plan to Make Further Investigations Next Summer

Buried tree trunks found in Alaska have scheduled wanderers suggest that Alaska was once a tropical or semi-tropical country. Prospectors who recently returned from the interior brought with them samples of sand and bark of strange trees which they had found at the bottom of a shaft that had sunk in quest of gold. The men ascended the Kobuk River and traveled forty miles south. Here in numerous holes they found dead and in layers similar to the drift of great storms, buried trunks of trees with rough bark as of fruit trees and long, thin blades of grass like bamboo, sorghum or papirus. The site of the region indicates a former tropical climate. Further investigation is planned for early summer in 1926.

Fur Coats Popular

Canada is taking a year for cost in preference to the United States, according to the bureau of statistics, the manufacture of fur coats, both women's and men's, is increasing, while that of fur-lined coats is declining.

Last year, there were 40,000 women's fur coats in Canada, but only 800 women's fur-lined coats.

If all were qualified to do something useful, where would the world be?—L. J. Lewis

When a woman decides that clear ashes aren't good for the carpet, the lioness is over.

FOR LISTLESS, DELICATE CHILDREN SCOTT'S EMULSION OF PURE COD-LIVER OIL

PALATABLE—EASY TO TAKE RICH IN VITAMINS

CLIPSE FASHIONS Exclusive Patterns by H. L. Lipp

1207

Smarty Simple

A triumph of chic and stenderness in navy milreides. It is most essen that every smart wardrobe should contain at least one frock of this type. In every detail it illustrates the theory that the long line is the shortest road to stenderness.

The two inverted plaits extend full length on either side of the front. A straight piece of the material is edged to form a trimming band two inches wide and placed beneath the side of the outside plait before it is stitched. Flat bone buttons trim the band. The back is plain and extends over the shoulder, and each side is finished with a tailored collar.

The Valued neck opening is a very becoming and is finished with a tailored collar.

The diagram pictures the size of No. 1207, which is in sizes 24, 26, 28, 30, 32, 34, 36, 38, 40 and 42 inches bust. Size 28 requires 4 yards of fabric, or 34 yards of 40-inch material. Price 20 cents.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every dress-maker. Price of the book 10 cents the copy.

Motor Car Runs On Storage Battery

A radio report from Moscow says that a man named Joffe, a doctor of sciences, has invented a storage battery that can run a motor car for 30 days and nights at highest speed without recharging. The report says that the battery is so small that it can be carried in a person's pocket.

It is estimated that less than 3 per cent of successful men remember anything about algebra.

ECZEMA OVER FACE AND BODY

Nearly Driven Crazy By Itching, Cuticura Healed.

"I was bothered for a year with eczema all over my face and body. It was in pimples and I kept it irritated by scratching for it nearly drove me crazy itching, and it kept me awake nights."

"I was treated but it did not help me, so when I heard about Cuticura I used two cakes of Cuticura Ointment and one box of Cuticura Cream. I was healed." (Signed) Alton Brooks, Charlotte, Vermont, Sept. 16, 1924.

Clear the pores of impurities by daily use of Cuticura Soap with touches of Cuticura Ointment as needed to soothe and heal. Cuticura is fragrant and refreshing, an ideal toilet powder.

Send for free book, "All About Eczema," Cuticura Soap and Ointment, 10¢ each.

C.P.R. Weston Shops

Building Covers 160 Acres and Property Represents Investment of \$4,000,000

The Young Men's Section of the Winnipeg Board of Trade were the guests of the Canadian Pacific Railway at an informal luncheon recently, at which an opportunity was given them in attendance to see through the Weston shops.

The construction of these shops was commenced in August, 1923, and completed July, 1925, representing an investment of \$4,000,000. The property appropriated for shop purposes was 120 acres, city and 40 acres are actually at the present time being used for shop purposes. The plant consists of 13 different shop buildings and one central store or supply building. There are 25 miles of service, industrial tracks and paved roadways used in conjunction with transportation of material and supplies. The machinery equipment consists of 1,179 machines, 453 electric motors representing a total horsepower of 5,200, boiler power plant generating 5,500 h.p. consuming daily 250,000 gallons of water. There are 22 miles of water, steam and oil and air pipes used in connection with the utilities, and the average number of men employed is 2,500. The coal consumed each day during winter months averages 75 tons. The monthly payroll amounts to \$250,000.

The principal buildings consist of a general store building carrying a stock of material representing \$1,225,000, with an annual turnover of \$5,000,000. The iron foundry, with a capacity of 400 tons, is a present turn-out of 100 tons per month. In conjunction with the foundry there is a modern machine shop in which all patterns are manufactured and stored, holding patterns to the value of \$75,000.

The locomotive shop has a capacity in output of 36 locomotives per month, and in addition contributes to the finishing of manufactured material to the amount of \$125,000 each month.

The blacksmith and forge shop is kept up-to-date in the matter of machinery mass production, and is fully equipped with dies and jigs. The forge shop only, has developed to such proportion that from new and repaired, required for use on western lines, are now handled in this plant.

The car shop, which has a capacity of 50 general repairs per month, are worked at their peak during the month of November, giving employment to a large number of tradesmen. The wood mill is modern in equipment, and in addition to taking care of the requirements in the loco shop, manufactures material for use in the repair of cars and locomotives, taking care of the territory as far west as Moose Jaw and east to the border of the United States.

The boiler shop of this plant is the largest of its kind in the Dominion, devoted exclusively to the repair of locomotive boilers. Freight car and steel car shops are also equipped with elaborate and extensive service 50 freight cars per day.

The tender, wheel and work equipment shops are the most modern of the plant. Cast iron freight wheels and steel road wheels are assembled in the shops, and the capacity is 125 pair cast iron and 36 pair steel tired per day.

As a result of the policy of the management in the matter of reclamation of waste and scrap, the plant has a large number of scrap metal and electric welding processes, large quantities of scrap metal for cars and locomotives are reclaimed.

The company and its officers, by their wise and far-sighted suggestions offered for the welfare of its employees. The Weston shops are the most modern of the plant. Freight car and steel car shops are also equipped with elaborate and extensive service 50 freight cars per day.

Gives Good Advice

Sir Robert Horns Returns From Can. ad Urging Britons to Emigrate

"I have just come back from Canada," declared Sir Robert Horns, speaking in Scotland, "and I cannot imagine that any man here would rather have a precarious existence, dependent upon charity, than go to the great Dominion and gain a new existence for himself by the sweat of his brow."

The foregoing sentiments were broadcast over Great Britain by Sir Robert Horns, chairman and editor of the Daily Express, who added his personal suggestion that as Sir Robert Horns was now free of government and financial ability to overseeing a scheme under which desirable people could be sent to Canada with good chances of success.

Winter Sports in Rockies

"Nomads" to Make Pack Horse Trips to Yoho Valley

An organization to be known as the "Nomads" has been organized by the late Mr. R. D. Bell, winter sports director at Lake Placid. It is intended to organize fifteen and thirty day pack horse trips through the Canadian Rockies into the Far North. The northern limit of the trail will be the Columbia ice fields. The western limit will be the Yoho Valley and as far south as Mount Assiniboine.

British Farm Boys

Approximately Four Hundred Registered For Training in Alberta

Three contingents of British farm boys are coming from various agricultural districts of England to Alberta for further training. Two parties of twenty are already at the schools of Vermilion and Olds, and another at Claresholm. With the addition of the newcomers, the registration of British farm boys from Alberta will number approximately four hundred.

No matter how deep-rooted the corn may be, it must yield to Holloway's Corn Remover if used as directed.

Doctor: "I suppose, Mrs. Johnson, that you're going to the medicine according to directions."

Mrs. Johnson: "Well, doctor, I don't mind. You said give Sam one of those head pills three times a day and I don't mind one of 'em 'til I'm yellow!"

Tommy: "Did you ever see an auto wreck, papa?"

Mrs. Johnson: "Yes, I saw a car hit another car, and then I saw it go into a ditch and turn turtle. Now don't ask any more questions."

Tommy: "But what did they do with the turtle?"

Many Crossing Mishaps

Railway Will Soon Have to Take Steps To Protect Property

Not the least of expenses in connection with operation of railway systems is the damage caused by new at level crossings by motorists who refuse to obey signals, or who give the meek excuse that their brakes failed to work. That the railways are approaching a stage where they will have to have protection against tank attacks from automobile drivers running through crossing gates and into the side of moving trains, is the belief of J. P. Pratt, assistant counsel for the Central Region, Canadian National Railways.

Manufacturing in B.C.

Growth of Manufacturing in the Prov. "Has Been Phenomenal"

British Columbia's growth as a manufacturing province is well illustrated by figures compiled by the Provincial Government. In 1880 only 415 plants were in operation, producing about \$2,000,000 worth of goods per year, whereas in 1921 no less than 3,556 firms were in operation, with a total payroll for \$107,000,000, and produced goods to the gross value of \$285,000,000 the capital investment amounting to over \$300,000,000.

Antelope Good Season For Trappers

According to advice from Fort Simpson, nearly 1,000 miles north of Edmonton, the indications are for a good fur year. Lynx and fox are numerous, while marten and beaver are well up to the average.

THURSDAY, NOVEMBER 26, 1925

THE NEWSPAPER

As an influence approaching, equalling or surpassing that of other institutions, the newspaper stands with unlimited possibilities in the field of community development. The informative and educative value of a newspaper is of great importance because the newspaper is so widely and so often read. Let us examine the standards by which a newspaper is measured:

To go into and remain in the home the newspaper must be clean, because it must stand the test of critical eyes and the pure in heart. To exert influence it must be truthful and candid, because it is weighed by the exactness of eye and ear witnesses from the same or other sources.

To maintain its prestige it must be fearless, because it stands as a representative of the entire community in semi-official advocacy of the rights of the people.

To succeed in a business way it must have circulation, because bona fide circulation is the value gauge by which the businessman and advertiser alofts his patronage.

To further its growth and progress it must have an experienced personnel and expensive equipment, which, if not competition, a well deserved professional pride will demand.

To fulfill its destiny it must occasionally challenge the opponents of true progress, for it is looked to as a spokesman of community development.

These things, and more, are the standards of a newspaper. That the newspaper is a live, going institution is proof that it is living up

to them. Cooperation by an appreciative public will help it to continue as an institution for the general good.

WHAT PRICE SUBMARINES?

There is a growing popular demand for the abolition of submarines. Lady Astor, member of the British Parliament, says she is willing to "stump the world" in behalf of the abolishment of undersea craft for war purposes. Submarines are primarily engines of war, instruments of destruction; and many people believe that as such they ought to be destroyed and their future death dealing portentions forever obliterated.

DON'T COMMERCIALIZE CALAMITY

We commiserate Mrs. Margaret Ross Lansdowne, widow of the commander of the ill-fated Shenandoah, for refusing to appear on the stage. May her decision be a worthwhile deterrent to the all-too-increasing tendency to commercialize disasters. The Fox News Reel concern refused to show pictures of the Santa Barbara earthquake ruins. Mr. Fox stating that his company was willing, if necessary, to stand alone in its refusal to gain revenue to the embarrassment of the victims and to the detriment of the community by directing exaggerated suggestions to the public mind.

BEST PEOPLE ON EARTH

The Elks Club of New York City has accepted without contest a prohibition padlock, under the charge that beer sold in its grill room had more than a legal kick. In a big institution like the New York lodge of Elks, which is the mother lodge, it is not impossible that infractions of the law might creep in, though not sanctioned by the trustees of the organization. The fact, however, that the lodge consented to the closing of its bar without opposition when the matter was brought to its attention, is rather an act of cooperation in law enforcement, and speaks well for the Elks' parodic slogan—"Best People On Earth."

MISSIONARIES BY RADIO!

In the near future there will be a large radio broadcasting station near London, Eng., that will be powerful enough to send messages to the "utmost parts of the earth." This will inaugurate marvelous changes. With suitable arrangements, missionaries may do their teaching by radio instead of facing the dangers of the jungle and the perils of barbarous tribes. A few receiving sets scattered over the earth surely will make "all the world a-kin."

BELOVED SOVEREIGN PASSES

The death of Dowager Queen Alexandra created Empire wide sorrow when the news was flashed to all parts of the world last week. She won the hearts of the British people when as the bride of the late King Edward VII she came to England from Sweden some sixty years ago, and she retained this love in an ever increasing measure during her long residence in the land of her adoption.

SQUIBATORIALS

All that totters is not old.

A razor in the hand is worth two in the cheek.

Be sure the lip you start to kiss is not a "dangerous curve ahead."

The highest form of pleasure is sometimes the greatest source of woe.

Who remembers when people thought it was nothing to walk three or four blocks?

No man ever really gets his eye-teeth out until he gets through the settlement of a near relative's estate.

People will willingly pay good money for a laugh, a cry or a kick, and then complain of the cost of getting pinched.

"Some men are successful chiefly because they didn't have the advantages others had"—Exchange. Nor the poverty.

A new radio invention stops a locomotive when there is "danger ahead." What we would like to see is something that will stop the neighbor's radio in the house next door.

It Pays

Here's some straight talk from Fred W. Anderson of Cozard, Nebraska, a Successful Merchant:—

"I have no sympathy for the merchant who sleeps between advertised blankets, on bed springs that are nationally advertised, sleeps in advertised pyjamas, who puts on advertised underwear, shirts, garters, shoes, and clothing when he gets up in the morning, who eats advertised cereals and foods for breakfast, who rides to work in an advertised car, and who, when he gets to work refuses to advertise. He ought to go broke—and he probably will. If I were to start, in business again today I would invest five per cent of my gross sales in advertising. It pays."

"Big Game Hunter Lauds Canadian Rockies"

Col. Philip Moore, Princeton Graduate, big game hunter, war veteran, and mountain climber, is as well known in the Canadian Pacific Rockies that, as one guide put it, "he has a grizzly when it passes him and asks after its misadventures and the cuts."

Ever since Col. Moore first visited the mountainous regions of Alberta and British Columbia, he has managed to spend part of each year hunting, camping, and climbing mountains. He returned recently from a summer sojourn in Yoho Valley, where he added a few more miles to his 2,500 mile record on horseback as a member of the "all riders of the Canadian Rockies."

The building of good roads through the mou. and a resultant growth in automobile traffic is a new feature which adds greatly to the increase in tourists. The opening of the Banff Windermere road, and the road from Lake Louise to Wapta, thus making a splendid highway all the way from Calgary through the Kicking

Horse pass and the valley of the Yoho, has given tourists glimpses of wonderful precipitous canyons topped by some of the most majestic ice-capped peaks in the Rockies. Then, too, the growth of the bungalow camp has been phenomenal this season. Those whom the palatial summer hotels do not attract yield to the lure of log cabins, perched on the shore of a crystal lake, and shaded by overhanging mountain peaks. With a haversack on one's back, one may hike from camp to camp, or, if one does not scorn the saddle, ride a pony along the leafy trails.

All these pleasures Col. Moore has proved, and intends to lecture this winter, as he has been doing for a number of years, about the "marvelous beauty of his beloved mountains. It is not selfish. He wishes others to share the joys of the "hone trail" which has lured him into mountain fastnesses ever since he forsook the academic halls of Princeton.

Laugh and Grow Fat

"But surely," urged Jones, "seeing is believing?"

"Not necessarily," replied Brown. "For instance, I see you every day."

Mistress: "You say you worked for the Van Twillers. Can you prove that?" New Maid: Well, mum, I can show you some spoons and things with their initials."

Jack: "Lend me two-bits, old man, I promise you, on the word of a gentleman, to pay you back tomorrow."

Tom: "Bring the gentleman round and let me see him."

"Please, uncle, will you make a noise like a frog?"

"What a funny question. Why do you want me to do that?"

"Because," said Bobbie, "when I ask father to buy me anything he always says, 'Wait till your uncle croaks.'"

Madge—"Wasn't there some talk of Mabel marrying a duke?"

Ethel—"Yes, but you see the duke didn't say anything to her about it."

Edmonton Reaches Manhood Age

Edmonton became an adult among cities Saturday, November 7th. Just 21 years ago, on November 7, 1904, Edmonton was officially created a city. Since that time the population has grown from 7,500 to 63,378; there are 20 trains entering the city daily as compared with one; 13,484 telephones in use where 450 supplied the baby city. The fur trade and the Klondike rush put the city on the map in the early days. Now it is the legislative and educational centre of the province and distributing point for central and northern Alberta as well as the gateway to the Arctic fur lands.

Man comes into this world naked and with nothing on him, but in a short time everybody has something on him.

A War Of Extermination

Despite the fact that the statesmen of the great European nations, and the League of Nations, are earnestly striving to bring about understandings and conditions which will have the effect of preventing future wars, we nevertheless read in magazines of this and that invention and the effect it will have on the "next war."

The "next war" is, as a matter of fact, now being waged. It has been in progress for some time and is increasing in intensity. But instead of being a war between man and man, this war of extermination between man and insects. Man has won victories in certain sectors of the battle line which extend around the world, although, in the language of the late Great War, he has not yet been successful in fully consolidating his position, thus making his victory secure and lasting. In other sectors, the insects still have the upper hand and seem to be gaining.

The battle between man and the insects is not spectacular but it is a strenuous and extremely costly one fought with grave possibilities if there is any slackening in man's onslaught until final and complete victory is obtained.

In the Canadian House of Commons last session, Hon. W. R. Motherwell, minister of agriculture, made a brief statement regarding the offensive being waged under the direction of that department against crop destroying insects in Canada when he was asking for an increased appropriation for this work, notwithstanding the general policy of reducing rather than increasing expenditures; and extending the scope of public services.

Addressing the Rotary Club of Ottawa a few days ago, Dr. Arthur Gibson, chief of the entomological branch of the Department of Agriculture, stated that from 10 to 25 per cent. of every crop grown is destroyed by insects, while millions of dollars worth of pulpwood was destroyed from the same cause.

It is estimated that the boll weevil caused damage to the cotton crop of the United States to the extent of \$200,000,000 each and every year, and it has been forecasted that this beetle may in time ruin the cotton growing industry of that country.

The bot, or warble-fly, which affects cattle, causes a loss in Great Britain alone of from \$10,000,000 to \$25,000,000 annually.

Here in the West we know by bitter experience what the sawfly and other insects do to the grain crops, and how many a promising field has been ruined by them.

But it is not in relation to crops and cattle alone that insects are waging war on mankind. This comparatively recent years, one-half the human death rate of the world each year was due to malaria, transmitted from person to person by the mosquito. For more than a score of years the mosquito held up the construction of the Panama Canal. Between 1881 and 1890 twenty-two thousand laborers on canal construction died of malaria or yellow fever, and the failure of successive canal companies was due to the mosquito, and it was not until the United States engineers studied and fought the mosquito that the canal was finally constructed.

The Rockefeller Foundation has provided millions of dollars for a campaign against the bookworm.

But if this war against the insects is to succeed it must not be left solely to governments, scientific bodies and interested experts. As in the Great War, the whole manhood and womanhood of the nations must be mobilized for victory.

The common house fly is a much more dangerous enemy of man than even yet, notwithstanding all the educational work that has been done, the average person is allies. If typhoid, diphtheria and other diseases are to be wiped out, the ill and disease carrying house fly must be first exterminated, and "swatting the fly" should not be regarded merely as a pleasing feat, or an amusing hobby, but as a really serious business in every Canadian home.

Governing experts have compiled much valuable information against insects which should be fought and destroyed and those which are allies to man. It remains for the individual citizen to apply that knowledge and co-operate with the Government departments of health and agriculture in waging the battle, upon the successful outcome of which depends human life—and could cost millions of dollars annually.

100-Story Buildings
The American city of 2000 A.D. will have buildings 100 or more stories in height, with landing stages for aircraft, and the streets will be two or three levels to relieve traffic congestion. This is the conception of the future metropolis, municipality as sketched by artists and architects who will exhibit their pictorial prophecies as one of the features of the American Institute of Steel Construction.

Wrap up warm inside

On a raw winter's day you wouldn't venture out without a good overcoat to keep out the cold. But your *inside* wants keeping warm as well.

Make a practice of drinking BOVRIL regularly during the winter months. It keeps up your vitality and helps you to resist colds, chills and influenza.

Homestead Entries

File On 29 Homesteads In Four Western Provinces In Western Canada

Homestead entries in the four western provinces during the month of September numbered 29, a decrease as compared with the same month last year, according to a report issued by the Dominion lands branch. During September last two homesteads were filed on in Manitoba, one in Saskatchewan, fifteen in Alberta and two in British Columbia.

Agony Of Lumbago

Quickly Soothed Away
By "Nerviline"

For the sharp, piercing pain of lumbago, and the torturing attack of Rheumatism, no liniment is so efficient, so quick in bringing relief and relief as good old "Nerviline." This wonderful liniment penetrates through the tissues very quickly, sinks at once to the core of the ailment, draws the blood from the congested area, and thereby relieves the pain in a short time. Those who suffer from stiff joints, swellings and Rheumatic conditions should use Nerviline, the King of Pain destroyers. Get Nerviline to day, 35c, at all dealers.

Eliminating Responsibility

The Indians of the Carajás tribe of Brazil kill their aged members when they have become so feeble that they can no longer migrate from place to place. These old people are tagged upon the head with a heavy club, and they subside cheerfully to their fate.

BABY'S OWN TABLETS ARE OF GREAT VALUE

To All Mothers Having Young Children In The Home

No other medicine is of such aid to mothers of young children as is Baby's Own Tablets. The Tablets are the very best medicine a mother can give her little ones during the dreaded teething time because they regulate the stomach and bowels and thus drive out constipation and indigestion; prevent colic and diarrhoea and break up colds and simple fevers.

Concerning Baby's Own Tablets, Mrs. John A. Patterson, Scotch Village, N.S., says: "I have six children, and all the medicine they ever get is Baby's Own Tablets. I would use nothing else for them and can truly recommend the Tablets to all other mothers."

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from Dr. Williams' Medicine Co., Brockville, Ont.

Plan To Reduce Crime

Offer \$2500 Reward For Best Programme To Reduce Crime In New York

An award of \$2500 is offered by the Society for the Prevention of Crime to the citizen or public official who presents, before January 11, the best programme to bring about the reduction of crime in New York city.

The announcement of the award states that while a single suggestion may win, the problem is so complex it seemed best to open the way for a programme or series of related efforts toward the solution. The Society is open to every citizen and public official in the United States.

The total number of words submitted must not exceed 2,000, which may include not only an exposition of the plan but argument for it. A brief summary, however, may accompany the manuscript, which must be typewritten. No manuscript will be acknowledged or returned.

Debt Funding Problems

France Hopes To Obtain Better Debt Terms From U. S.

Hopes that France may obtain far better terms than the United States debt funding commission was willing to give M. Caillaux have been raised by the Italian debt settlement. The terms are regarded in official French circles as sharply contrasting with the demands made upon France.

It looks, however, as though nothing can be done before next year to re-open negotiations with the United States, and that whatever is done then will depend upon the outcome of the financial crisis.

Seed Extraction Plant

The Dominion Government seed extraction plant at New Westminster, B.C., is expected to start operations soon. A consignment of 100 sacks of Sitka spruce cones from the Prince Rupert district is practically assured for the British "forestry" commission, London. Only 50 sacks of Douglas cones will be picked in the Fraser Valley to fill the Old Country order.

John Shields, Maryland's champion whittler, has made a violin from matches.

British Columbia Paper Mills

New Selling Product On An Ever Widening Market

British Columbia paper now selling on a widening market. It supplies Western Canada and a large part of the Western Pacific coast states; 1,000 tons monthly goes to Buenos Aires, and orders were recently sent to France, which it is expected will become a steady market. A market has now been opened at Antwerp. As a result of the new Canada-Australia trade treaty, paper manufacturers are looking for a big demand from that market, which had been hitherto restricted due to a high import duty demand.

Miller's Worm Powders work so effectively that no traces of worms can be found. The pests pass away in the stools without being perceptible. They make an entire and clean sweep of the intestines, and nothing in the shape of a worm can find lodgment there when these powders are in operation. Nothing could be more thorough or desirable than this action.

To Relieve Farm Drudgery

Modern Methods May Soon Be Applied To Make Work Easier In The Farm Home

The Minneapolis Journal remarks that men who only a few years ago predicted the coming of a time when wire-borne current, long used in cities, would take much of the drudgery out of farm chores were looked upon as impractical dreamers. But so were the men who first saw the possibilities of radio. So were Edison, Bell, Morse, Stephenson and Fulton dreamers in their day. The steamboat dream came true. So did the railway dream, the telegraph dream, the telephone dream, the electric light dream, the automobile dream, the motion picture dream, the radio dream. And so the drudgeless farm dream may come true.

Her Heart Palpitated She Had Fainting Spells

Mrs. J. Wilson, Port George, N.S., writes: "I suffered from palpitation of the heart and fainting spells, and at times, I could not be left alone I was so nervous."

"My trouble was caused from overwork and worry, having been left alone with a large family."

"I had tried everything without any relief, but I know, to-day, that I would have been a nervous wreck but for your wonderful

These Pills are for sale at all drug stores and dealers; put up only by The T. Milburn Co., Limited, Toronto, Ont.

Fame after all is but an elevation on which the victim is placed in order to give the public a better chance to throw mud at him.

Insanity may be more prevalent but you don't notice it except on the highway.

How He Discovered Best Constipation Relief

Mr. Joseph F. Glus of Brooklyn, N. Y., writes "I was troubled with constipation. Every remedy I tried would work O.K. for a while—but soon failed. The only remedy I have seen able to use steadily with good results have been Carter's Little Liver Pills. I don't guess when I take them I know I'm going to feel relieved. Ask at all druggists."

SUNDAY SCHOOL LESSON

NOVEMBER 29

PAUL BEFORE AGRIPPA

Golden Text: I was not disobedient unto the heavenly vision. Acts 26:19.
Lesson: Acts 25:1 to 26:32.
Biblical Reading: Psalm 42:1-5.

The Text Explained and Illumined

Paul's last lecture before Agrippa verses 1-23—King Agrippa was Herod Agrippa II, ruler of small principalities in Northern Palestine, with the title of king; son of Herod Agrippa I, who slew James the son of Zebedee; great nephew of Herod Antipas, who beheaded John the Baptist; great grandson of Herod the Great, who massacred the innocents in his attempts to kill the infant Jesus. Paul began his defense not only for himself but of the gospel he preached by courteously referring to Agrippa's knowledge of Jewish questions and customs, and then he told of his own life as a Pharisee, his persecution of Christians, his conversion, and his commitment to preach to the Gentiles. To the heavenly vision granted him on the way to Damascus he had been obedient.

"It is not enough that a man should say, 'Whereupon I am convinced of the vision,' or 'Whereupon I understand the vision.' Slight apprehension, theology, orthodoxy, they are all very well, but the right result is 'Whereupon I am convinced of the vision.' And unless your knowledge of Christ makes you do, and keeps you from doing, a thousand things, it is only an idle vision which adds to your guilt!" (Dr. Alexander MacLaren).

The Russian Front

Bolshevik Activity Against the British Empire Has Been Redoubled

It is a singular coincidence that the points where Russian and British influences clash are the same as those which were the scenes of Anglo-Russian rivalry in the unhappy year before the agreement of 1907. Territorial spoliation is out of date; but penetration by propaganda has taken the place of arms in the struggle for power. Bolshevism is a worldwide revolution in this country at the last general election, Bolsheviks actively against the British Empire has been redoubled elsewhere. And in the east the schemers of Moscow believe that they have found the Achilles heel of Great Britain—London Times.

As a veritable excellent preparation to Miller's Graves from Extermination. It has saved the lives of countless children.

Manufacture Of Sugar

Amount Produced In Canada Continues To Increase

The amount of sugar manufactured in Canada month by month continues favorably in excess of the amount manufactured in 1924. For the four-week period ending October 30, 91,913,214 pounds were manufactured, as against 92,785 pounds in 1924. For the year to date, 917,075,516 pounds were manufactured, as compared with 653,622,219 pounds in the previous corresponding period.

Exports of refined sugar from Canada during the month of September show a remarkable increase as compared with the same month last year. According to a report of the bureau of statistics, shipments during September have amounted to 23,400,265 pounds, as compared with only 82,350 pounds in September, 1924. The value also shows a corresponding increase, being \$1,388,399 in September, as against \$468,316 in the same month a year ago.

Simple and Sure.—Dr. Thomas' Electric Oil is so simple in application that a child can understand the instructions. Used as a liniment the only direction is to rub, and when used as a dressing to apply. For directions are so plain and unmistakable that they are readily understood by young or old.

On World-Round Trip

May Be Last Time To Circle Globe In a Windjammer

The five-masted barkentine, Forest Dream, is outbound from San Pedro, Calif., on what may be the last circumnavigation of the globe by a windjammer. Port Louis, on Mauritius Island, in the Indian Ocean, will be the Forest Dream's first port of call. That is about 18,000 miles from the California coast. After discharging its 2,000,000 feet of lumber there, it will continue eastward to Australia, load coal at Newcastle and come home via the South Sea Islands.

A true philosopher is one who can distinguish between tolerance and selfish indifference.

Epicures are people who dislike to waste good hunger on poor victuals.

People who strike in the dark may mean well, but they seldom hit the right spot.

APPEAL IS MADE BY CURRIE FOR NATIONAL UNITY

Hamilton, Ont.—A stirring appeal for national unity as a lasting memorial to the sons of Canada who paid the price of victory with their lives, was made by Sir Arthur Currie, who officiated at the dedication of the memorial school to the memory of 1,300 Hamilton men who died in the Great War.

Canadians of today had a solemn obligation resting upon them, said Sir Arthur, "to treasure and conserve the lives handed down to us by our forefathers." Because of the record of their sons, Canada had reached a place in the world which a short time ago was considered impossible of attainment. With pride, Sir Arthur said that a Canada had been chosen as head of the League of Nations. "Comradeship and unselfishness were qualities of the Canadian soldiers," he declared, "and there arose a unity of purpose among them never before known. Why should we have sectionalism in Canada? Why east or west? Why creed distinction? Why should we need to plead for courage in times of peace when it is not necessary to do so in war time? It is not Alberta or Nova Scotia, Quebec or Ontario, but Canada. This is the spirit we want. It is the spirit which is worthy of the men whose memory we commemorate to night."

Resents Action Of Pacific Cable Board

Report Says Postmaster-General's Taxation Exception to Methods Adopted Respecting New Cable

London.—The Daily Express says it understands that the postmaster-general of Canada, Hon. Charles Murphy, has recommended the Dominion Government should withdraw from participation in the Pacific cable board. The withdrawal, the Express says, is on the ground that among other things, that duplication of the cable from Banfield, Vancouver, to Fiji, was decided upon in the absence of Canadian representatives and the contracts were therefore awarded despite Canada's protests and in defiance of the provisions of the Imperial Cable Act, which, unanimity in such matters is essential.

Ottawa.—In the absence from the city of Hon. Charles Murphy, precise information in regard to his representations on the Pacific cable are not available, although it is said the government has not yet taken any definite step, looking to the withdrawal of Canada from participation. It is understood, however, that Murphy has taken strong objection to methods adopted by the board in respect to the new cable.

Canada's Total Trade Shows Big Increase

For Seven Months Ending October Increase Was \$197,000,000

Ottawa.—Canada's total trade increased \$197,000,000 during the seven months ended October, according to figures issued by the customs and excise. The increase is in comparison with the figures for the corresponding seven months of the previous fiscal year.

As between export and import trade, it is made up as follows: Increase in export trade \$129,000,000; increase in import trade, \$68,000,000. Total trade increase \$197,000,000.

Over the seven months period the increase in exports of farm products classed as mainly food, was fifty-two millions; in farm products other than food, thirteen millions; in animals and animal products, twenty-seven millions. Exports of wood, wood products and paper increased sixteen millions.

Says Hydrogen Will Run Motor
Toronto.—Professor J. C. McLen, head of the physics department at the University of Toronto, famous for his discoveries and researches with helium, predicts that there will be some day a new type of motor which would receive its power from hydrogen and the driver will carry extra tanks in his vest pocket.

Agreement Reached
Peking.—The customs conference announced that its sub-committee appointed to elaborate a formula regarding the restoration of tariff autonomy to China has arrived at a complete agreement. "The formula was submitted to a full meeting of the delegates on November 18."

Saskatchewan Corn Show

G. M. Hoffman, Maple Creek, Carries Off Sweepstakes

Ottawa.—Saskatchewan's corn king at the first corn show held in Maple Creek, was again awarded first place at the third provincial corn show held at Indian Head.

Maple Creek made a clean sweep of the special prizes. In addition to the sweepstakes, Mr. Hoffman won the silver trophy cup offered by the Ogilvie Flour Milling Company for the best exhibit of ten ears of any variety of corn or yellow dent, winning this competition with Minnesota No. 12.

A. J. Colquhoun, of Maple Creek, won the shield offered by the Regina board of trade for the best ten ears of any variety of Flint field corn, and also the silver cup donated by the Saskatchewan Wholesale Implement Association for permanent competition amongst Saskatchewan exhibitors showing corn for the first time. Miss Emily Ford, Maple Creek, won the silver cup offered by the Saskatchewan Creamery Company for the best ten ears exhibited by a girl in the Junior section.

A. S. Unsworth, of Pilot, won the first prize for the best chest of corn grown under field conditions. His show was considered by the judges to be one of the finest exhibits of the whole show as there was a great bulk of green forage and ears that would all have been prize ears peeping out of the foliage.

Three other prizes for the same event were awarded to D. Hoffman, G. H. Hoffman and E. G. Hoffman, Maple Creek.

Saskatchewan's fourth provincial corn show will be held at Estevan. The invitation, presented by T. A. Torgeeson, president of the Estevan Agricultural Society, and managing director of the Prairie Nurseries, was accepted.

August Peterson, Weyburn, was elected as president of the association, with T. A. Torgeeson, Estevan, as vice-president. The full board of patrons follows:

Patrons: Hon. W. R. Motherwell, Hon. C. A. Dunning, Hon. C. M. Hamilton, Dr. Angus McKay. President: T. Torgeeson, Estevan. Second vice-president: F. Colquhoun, Maple Creek; secretary-treasurer, Colgate Moore, Estevan; executive, A. G. Garish, Estevan; W. Cleophas, Estevan; A. A. Evenden, Estevan; Bert Hoad, Estevan; G. D. Matthews, Indian Head; directors: R. P. Robbins, Shaunasson; Geo. Spence, Moncey; F. Burton, Vanguard; J. G. Taggart, Swift Current; H. S. Atchison, Pilot; Prof. Champlin, Saskatoon; Prof. L. E. Kirk, Saskatoon; Prof. J. G. Bayner, Saskatoon; M. P. Tullis, Regina; P. A. Forsyth, Prince Albert; Paul Vialley, Weyburn; Tom Howles, Empress; Bert See, Weyburn; Norman M. Ropp, Indian Head; R. M. McCall, Swift Current; W. J. Warren, Bellevue; G. H. Hoffman, Maple Creek; C. Marks, Midale; W. H. Gilson, Indian Head; Percy E. Reed, Regina.

Has Faith In Canada

Sir Henry Thornton Entertained at Dinner in British House of Commons

London.—Belief that Canada was on the threshold of great prosperity, was expressed here by Sir Henry Thornton, president of the Canadian National Railways, who was entertained at dinner in the House of Commons by Mr. Lloyd George.

Sir Henry spoke of the opportunities awaiting the investment of British capital in Canada, and emphasized the importance of obtaining British capital in the Dominion rather than capital from foreign sources.

Among the guests were Premier Baldwin, former Premier Ramsay MacDonald and right Hon. Winston Churchill.

Approve Peace Pact

British House of Commons Ratifies Security Agreement

London.—The spirit of Locarno pervaded the crowded House of Commons when ratification of the European (Locarno) security pact—the Treaty of Mutual Guarantees—was voted 375 to 12. A Labor amendment was defeated previously, 320 to 130.

When the speaker put the motion for approval, presented by Austen Chamberlain, secretary for foreign affairs, there was an almost unanimous vote in his favor. But back bench Labor members persisted in calling for a division. The majority of the Laborites voted with the government, but about a score abstained from voting.

To Negotiate Treaties

London.—The Daily Mail says the Irish Free State is about to negotiate economic treaties with Germany and Germany. Both France and Germany believe they will find a market in Ireland.

Canadian Exhibit Is Success

Growing Accounts Received at Ottawa From New Zealand

Ottawa.—Ideas from Dunedin, N.Z., to the department of immigration here, contain glowing accounts of the success of the Canadian court at the Dunedin exhibition which was opened Nov. 17. The dispatch, from D. H. Ross, Canadian trade commissioner in Australia, who is in charge of the Dunedin exhibit, declares, the Canadian section as follows:

"The exhibition covers 18 acres, and is one-third the size of Wembley. 'The Canadian court is 27,000 square feet in area and is in the most prominent section of the grounds."

"The magnificent golden entrance gates to the court are lined with a 'Welcome.' At the end of the main corridor is a striking dome composed of a huge water-tail, pouring over 10,000 gallons of water a minute in a setting of natural rocks, trees and shrubs with a background depicting actual scenery of the Canadian Rockies."

"The lighting system changes at intervals, from broad daylight to moonlight, providing a spectacle that has not been seen at any previous Canadian exhibition. Canadian emblems, including maple leaves, beavers, and moose, and the coat of arms of the Dominion, are used extensively."

ASK IMMEDIATE COMPLETION OF THE H. B. ROAD

Winnipeg.—Arguments of Western Canada in pressing for completion of the Hudson's Bay Road were advanced before the conference by R. R. McMillan, Saskatoon; Irvin-Gen. W. Patterson, Winnipeg, president of the Ontario-Hay Association; Prof. R. C. Wallace, of the Manitoba University; and F. H. Martin, Winnipeg.

Armed with reports of competent engineers and other authorities, the speakers called upon the assembly to give its support to the "Hudson's Bay Road of the prairies." Millions of dollars of the people's money, Mr. McMillan asserted, had been expended on the road which exhaustive investigation has proved to be feasible in addition to affording a needed outlet to the sea for the central portions of the Dominion.

Those who were apathetic for the completion of the road were not asking for the expenditure of forty or fifty million dollars, Irvin-Gen. Patterson said, "All we ask is the fulfillment of pledges made by successive federal governments and the same chance that has been given to Montreal and other Canadian ports, upon which many millions have been spent in development. We are only asking for reasonable treatment. There is no attempt being made to divert traffic from the railways at present serving the country, but export trade now going through the United States is wanted. General Patterson warned against dangers of further procrastination, stating that rehabilitation of the road would involve doubling the outlay if it were abandoned to the elements."

General Patterson estimated it would require approximately six million dollars to complete the road to Port Nelson and provide the necessary harbor and channel facilities.

Dr. Wallace referred to the possibilities of the north country, declaring the completion of the line would contribute to the extension of the country north and south and bind together east and west.

Winchester, Eng.—Thomas Towers, former first officer of the Canadian Pacific liner Melita, was found guilty at the Winchester assizes of the murder of Captain A. H. Clegg, commander of the Melita, on board the ship at Antwerp, on October 31, but was declared insane.

Towers will be detained "during the King's pleasure," presumably in an insane asylum.

RACIAL REVOLT SWEEPS THROUGH ISLAMIC WORLD

Paris.—The rebellion against the French administration in Syria is not simply an internal quarrel, but the symptom of a vast religious and racial revolt that is sweeping through the Islamic world. This was the warning which General Sarrail, recently recalled as French high commissioner in Syria, voiced before members of the joint army and foreign relations committee of the Chamber of Deputies.

But, he added, the flame had been fanned by the attitude of his predecessors toward the family of Sultan Atitrah, who, fired with the ambition to be a second Abd-el-Krim, is leading the Druses with their adherents—Bedouins and certain Trans-Jordanian elements—against the French.

The French forces, now amounting to 20,000 effectives in Syria, he contended, were insufficient, and he laid stress on the need of reinforcements.

Says Canada Needs National Sentiment

People Must Solve Many Problems Opinion of Winnipeg Man

Winnipeg.—The moulding of a national sentiment towards the development of the Dominion creation of a spirit of imperial unity, national economy and aggressive assault upon the fundamental problems facing Canada today were urged by leaders in the Imperial life of the Dominion at a session of the national economic conference here.

Travers Swatman, K.C., former president of the Winnipeg board of trade, declared Canada's development depended upon the measure of aggressiveness and determination with which the people of the Dominion applied themselves to the tasks which, when solved, would take the country out of its present difficulties and elevate it to a position among the virile, prosperous nations of the world.

Predicts Greater Immigration Next Year

C.P.R. President Says New Arrivals Will Help Completion of Road

Winnipeg.—"I confidently expect a revival in British immigration to Canada in 1926 due to steady publicity and the facilitating of admissions arising out of the new arrangements between the Canadian Government and the railways," said E. W. Beatty, president of the Canadian Pacific Railway, who arrived here to address the delegates attending the economic conference.

"There is no general tendency in Great Britain to decry Canada," said Mr. Beatty, "but we have not been as insistent as we should in pressing the advantages of this country or until recently to offset the adverse propaganda there, most of which has had nothing whatever to do with Canada as a desirable place to live in."

Towers Found Guilty

Winchester, Eng.—Thomas Towers, former first officer of the Canadian Pacific liner Melita, was found guilty at the Winchester assizes of the murder of Captain A. H. Clegg, commander of the Melita, on board the ship at Antwerp, on October 31, but was declared insane.

For Calendar Reform

League of Nations Would Establish Fixed Day For Easter

Geneva.—An appeal for help in reforming the calendar has been dispatched throughout the world by the League of Nations, which especially craves assistance in the delicate task of establishing a fixed date for Easter. Calendar reform has been entrusted by the league to a special committee which includes ecclesiastical as well as of large religious movements and also a United States member, Willis H. Booth, former president of the International Chamber of Commerce.

Secretary-General Drummond, in a letter sent to all members of the league, explains that the need of definitely fixing a date for the Easter festival is felt in economic and educational circles. All governments are requested to forward views of their educational departments in the matter.

Juvenile Champions Attend Winter Fair

Six From Prairie Provinces Enjoy Royal Show at Toronto

Toronto.—After literally bringing home the bacon by producing the highest grade hogs in their respective counties, six juvenile champion avian breeders went to the Royal Winter Fair at Toronto as guests of the Canadian Pacific Railway. To Vera Johnson and Oscar (Winnipeg), who are from the Peace River district, 15 miles from the end of steel, and 2,500 from Toronto, this constitutes the railroad journey in their lives. Miss Mamie McCormack and Miss Grace Egan, of Kenora, Man., are the champions of breeders of Manikins, while Lorne Joynt and Fred Argue, the Lorne-Joynt champions, are from Rouleau, Sask.

New Garnet Wheat

Hon. W. R. Motherwell Attaches Much Significance to Discovery

Toronto.—Hon. W. R. Motherwell, Dominion minister of agriculture, who attended the Royal Winter Fair here, attaches much significance to the discovery of the new early-ripening garnet wheat which, he said, was just as prolific as any varieties.

New impetus to raising wheat in the west will result by use of Garnet wheat, according to Hon. C. M. Hamilton, minister of agriculture for Saskatchewan, who is in Toronto on route for Ottawa.

Saskatchewan Legislature

Announced That Assembly Will Meet On December 3rd

Regina.—The Legislative Assembly of Saskatchewan will convene Thursday, December 3rd, Hon. Chas. A. Pridgen, prime minister of Saskatchewan, has announced.

When the newly-elected house meets at 3 o'clock that afternoon, following the opening of the new year, upon the first session of the sixth legislature of the province. Twenty-one new men will take their seats in the Provincial Legislature for the first time.

HOW FARMERS HAVE BENEFITED BY WHEAT POOL

Chicago.—Wheat farmers in the United States this year will profit to the extent of between 50 and 75 million dollars as a result of indirect benefit derived from the way the Canadian Co-operative Wheat Producers Limited has handled the Canadian wheat crop in its price.

This startling commentary and outstanding praise for the Western Canadian Wheat Pool came from the lips of Theodore E. Hammett, of the federal department of commerce, who has just returned from an extensive study of the pool marketing methods. Hammett was sent to Western Canada by Herbert Hoover, secretary of commerce, to study the new method of marketing grain and he is enthusiastic in his praise.

As the personal representative of Hoover, Hammett explored the wheat pool from every angle. He canvassed its record for effectiveness as well as possibilities for the future, and he found no flaw either in the principle or its application. Hammett gives unreserved credit to the wheat pool for keeping up the price of world wheat, and it is his conclusion that he bases his belief that American farmers have benefited enormously by feeding the wheat slowly to the market, instead of allowing the market to dump their crop precipitously, as in previous years. They met the world demand without creating a surplus.

West Leads in Heavy Horses

Toronto.—Western Canada has demonstrated supremacy in heavy horse breeding at the Royal Winter Fair. No championships were awarded, but western breeders secured the great majority of prizes for Citybred horses.

GRAND TRUNK IS CAUSE OF DEFICIT ON GOVT. ROADS

Ottawa.—Comment on the controversy between the Canadian Government and certain of the Grand Trunk shareholders in connection with the annual report of the department of railways and canals, just issued. In this respect the deputy minister, Major G. A. Bell, reviews the history of the five years since the G.T.P. was taken over by the government, and states that during that period \$24,756,781 had to be provided for investment account of the whole Canadian National system, including new construction, betterments, property acquisitions and new equipment, and that in all \$27,825,435 was added to the debt of the roads comprising the Canadian National Railways.

One of the remarkable attitudes of a section of the British press," continues the deputy minister, "is worthy of note that during that period the Grand Trunk has required loans and advances from the government amounting to \$103,758,182 as well as \$15,000,000 on Grand Trunk Pacific account. And in addition to the guarantee in perpetuity of the interest on certain debenture stocks as well as in the acquisition account—stocks at par value of \$216,507,31 with interest requirements totalling \$3,988,833 annually—the government has also guaranteed on Grand Trunk account, since acquisition two bond issues of \$25,000,000 each, and floated an equipment note issue of \$12,000,000. The report goes on to point out that since the reorganization of the road the bonds issued by the Canadian National Railway, no less than \$24,599,157 was advanced to the Grand Trunk in addition to the aid referred to in the preceding paragraphs.

May Boycott Mussolini

Report in London That This Is Intention of Labor Members

London.—If Benito Mussolini, the Fascist Premier of Italy, comes to England on December 1 to sign the Locarno pact, it is possible he may be compelled to motor from the port of London to the hands of the Italian press. It is thought that in view of the report that the Labor leaders and Labor members of parliament intend to boycott Mussolini, he will be obliged to travel on a train on which he is a passenger.

This is the talk among the trades unionists. Although the Locomotive Engineers' Union has taken no action, John Bromley, its secretary, says a refusal by the tradesmen to bring Mussolini to the capital would not surprise him.

The Daily Express says that the probability of antagonizing Mussolini in London is exercising the Scotland Yard authorities. The newspaper adds that other distinguished visitors will be accommodated at hotels, but it is in no position to hinder them, although the British Government's guest, may stay at the Italian embassy.

Urges Higher Price For Agriculture

Should Have Better Standing in Universities Says Dean Howes

Toronto.—A plea by Dean Howes, of the College of Agriculture, University of Alberta, for a more important place for agriculture in higher education, featured the addresses at the joint dinner of the Ontario Agricultural College alumni and the Canadian Society of Technical Agriculturists here.

While stating that he did not wish to draw any comparisons, Dean Howes pointed out that the College of Agriculture was a part of the faculty of the University of Alberta and the students had not, only proved themselves capable of winning an equal medal in the field with those of the other faculties, but on three different occasions one of their number had been elected as president of the student body of the university.

Pepini Is Acquitted

Toronto.—Andrew Pepini was acquitted by a jury under Mr. Justice Wright in the charges here on charges of obtaining money in an equal credit Ontario Government bond transactions. The jury reached their verdict after four hours and twenty minutes consultation, and found Pepini "not guilty" on all charges preferred against him.

West Leads in Heavy Horses

Toronto.—Western Canada has demonstrated supremacy in heavy horse breeding at the Royal Winter Fair. No championships were awarded, but western breeders secured the great majority of prizes for Citybred horses.

DISCOUNT BONDS HAVE CASH VALUE

Announcing Our New Cash Discount System

A Simple, Self-Working Plan that Saves
You Money on Every Cash Purchase

On Thursday, November 26th, we are introducing a permanent new system of CASH DISCOUNTS.

For each and every 25c you spend in this store, on and after that date, you will receive a CASH DISCOUNT BOND.

You can then use these BONDS in this store just the same as money. We will redeem them, at their full face value—at any time—in any number—on any purchase.

These BONDS mean an additional Discount on prices that always represent the highest values obtainable in quality of goods, and of service.

There are no strings—no conditions. Just make sure you get your BONDS—then cash them here whenever you are making purchases.

No Thrifty Buyer Can Afford to Overlook
The Worth-While Savings these Bonds Offer

Bootleg Justice

One big reason why Canadians will not rally very strongly around the firey banner of the K. K. K. is because they are Canadians. The next reason is that they will resent the interference of foreigners in their domestic affairs. The third reason is that they have a sense of humor.

Canadians do their fighting in the open. They do not subscribe to the venomous habit of prowling around in a bedsheet.

Canadian justice does not need to be supported by any masked order. If these foreign organizers have the secret of law enforcement up their sleeves, why did they not do something with their countrymen So-wash, Baker, Morris, Stone, Johnston, et al., before Canada had to go to the expense and trouble of hanging and lashing them?

"Klages," "Klazes," and all the rest of the gibberish strike Canadians as funny. They see no reason for dressing up like a spook and acting like a darn fool to do something they can do at the polls in the open.

However, the invasion of the K. K. K. is probably fair enough. Canada sends United States bootleg liquor which is often not so good. Why then should we deny our neighbors the pleasure of trying to bootleg a little spurious justice to us.

Coleman Elks are holding another of their popular whist drives and dances on Friday of this week. All Elks and members of their families are heartily invited.

Cranbrook Rod and Gun Club's first annual dinner and campfire held last week, was attended by over two hundred sportsmen from Cranbrook and the State of Idaho. It was one of the finest events of this nature ever held in the West.

Pat. Kiernan's Experience

The hours I spend with thee, dear heart,

Are fraught with joy and bliss, altho
At times I'd like to kick apart

My Radio, my radio.

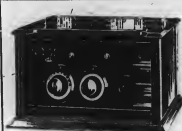

Each word a shriek, each song a
blare

But still I tune, and tune in vain—
I listen in unto the end, and there

You screech again.

Why Mayors Turn Gray

A money by law was submitted to the burghesses of Drumheller last week and out of 400 citizens entitled to vote thereon only 30 exercised their franchise. This and lack of interest in municipal affairs is what tries the patience of those elected to conduct civic government.
